5 Stages of Intelligent Data Management

Veeam Availability Platform for Hybrid Cloud

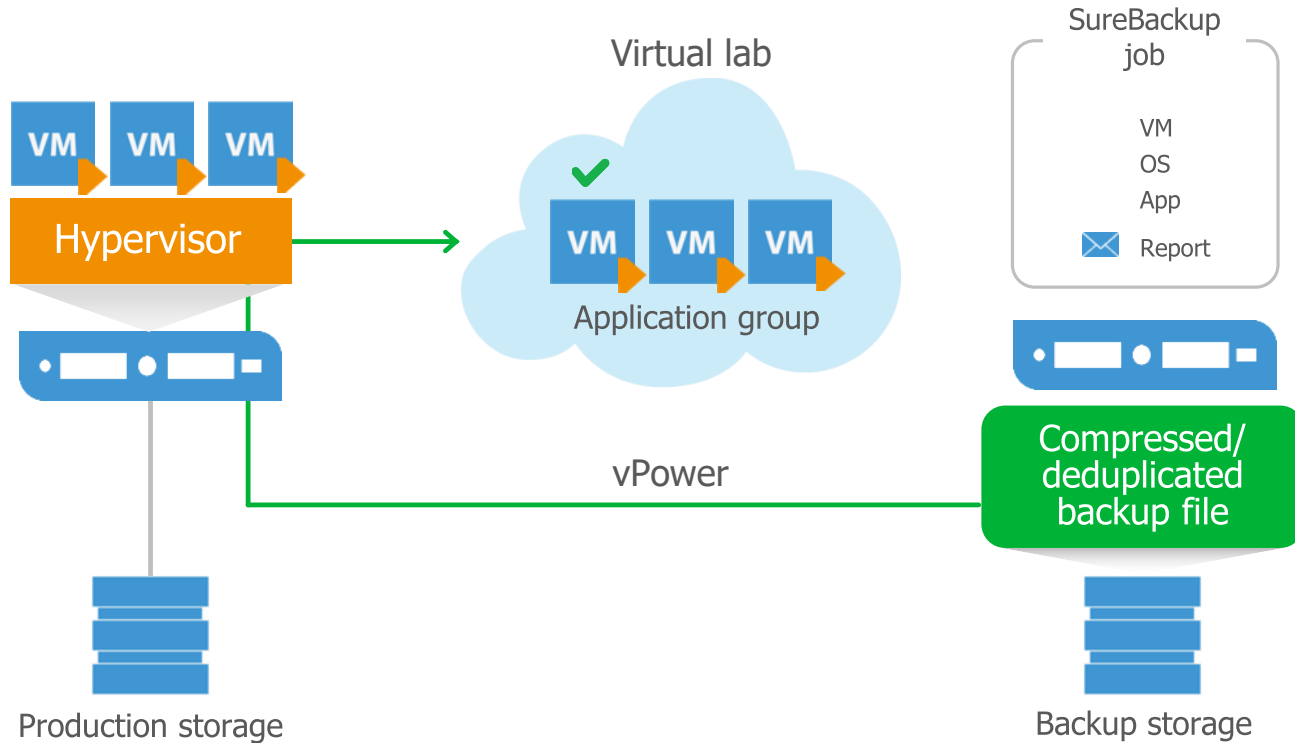

Asegurar los datos,
probarlos y utilizarlos

SureBackup + On-demand Sandbox + U-AIR

Automate restore tests + run pre-prod environment + retrieve any piece of data

VEEAM

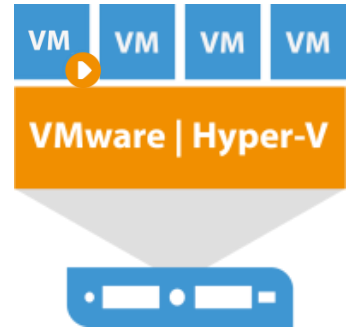

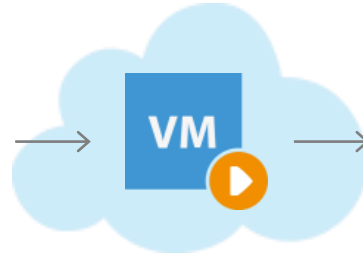

Dato Fiabile
GDPR

Staged Restore

Capability to provide data management before restored data goes (back) into production. Example: Data deletion task.

Backup job is verified using SureBackup

John Smith is interested by a house in October 2017, registers all his detail info the construction company database

Construction Company database server in production crashes and requires backup recovery

Construction Company takes a backup of this database including John's contact and other info

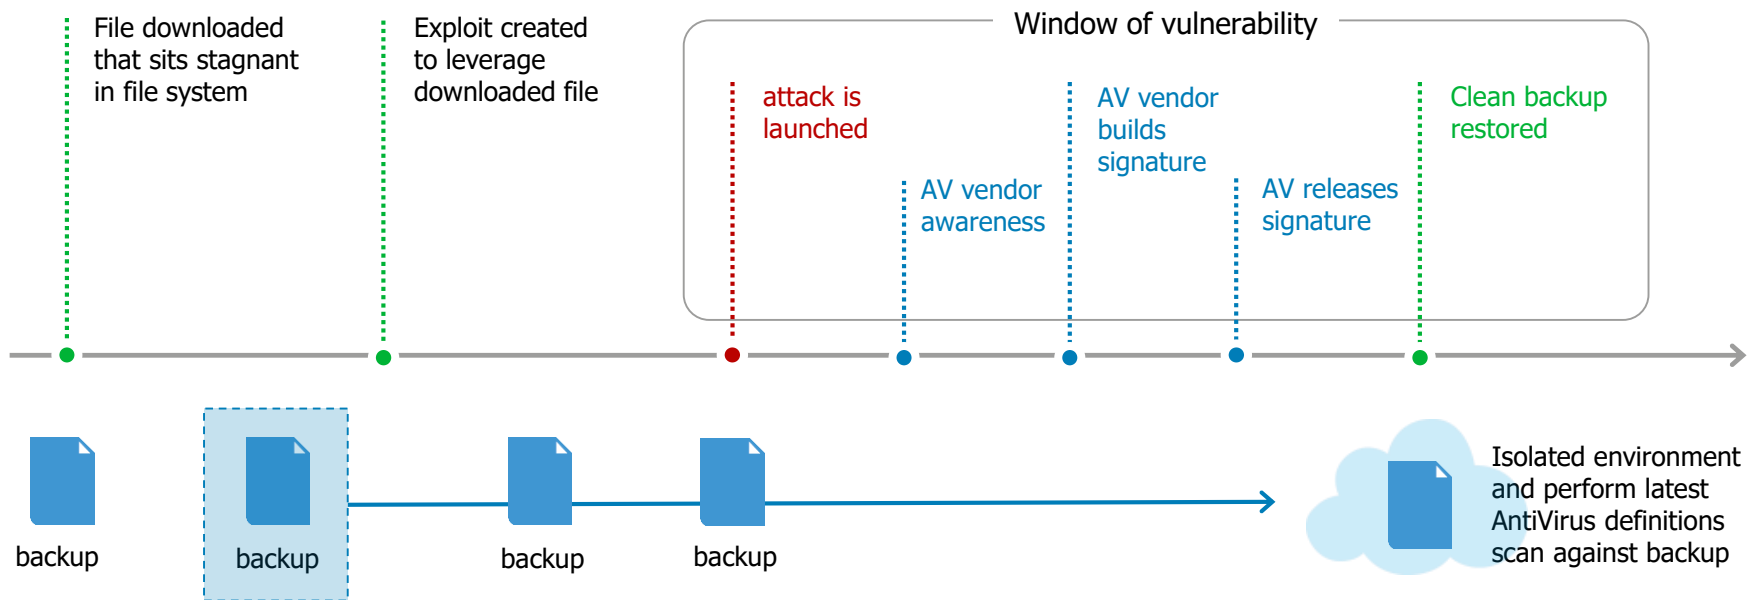

Power on machine in isolated data lab. Inject script to remove John Smith data as this cannot be restored back into production

VEEAM

Dato Seguro Antivirus

Secure Restore

Permits restore without re-exploitation of zero-day risks

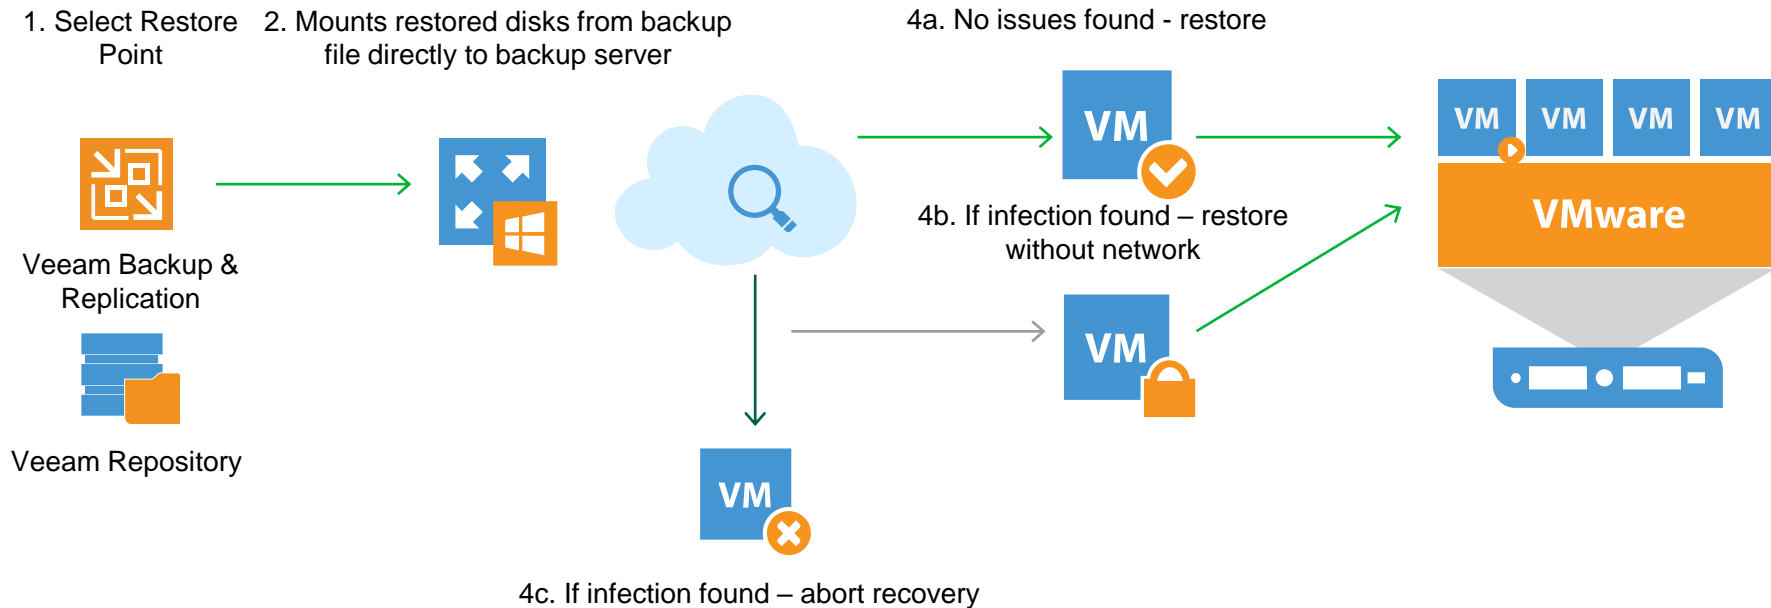

The key to the fastest recovery is making sure you go back far enough to remove the risk of that downloaded file

DataLabs Secure Restore

An optional part of the restore process:

3. Triggers AV scan of mounted volumes

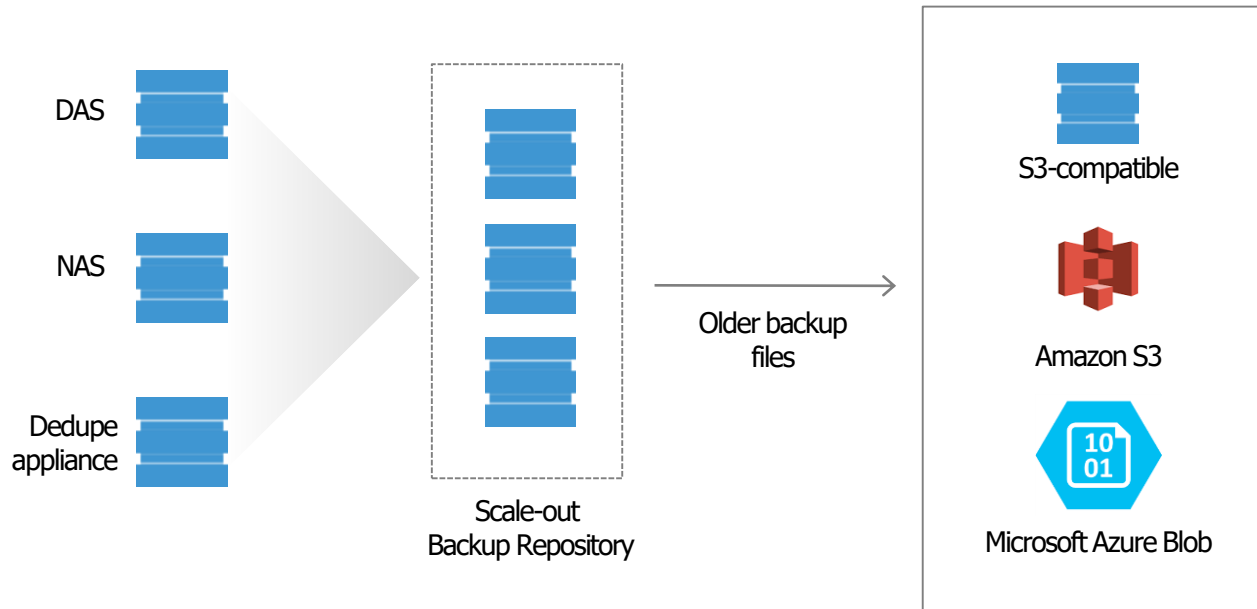

DataCenters Limitados

Ubicación y Desbordamiento

Veeam Cloud Archive

The Archive Tier feature of Scale-out Backup Repository facilitates moving older backup files to cheaper storage, such as cloud or on-prem object storage

VEEAM

Movilidad & Cloud

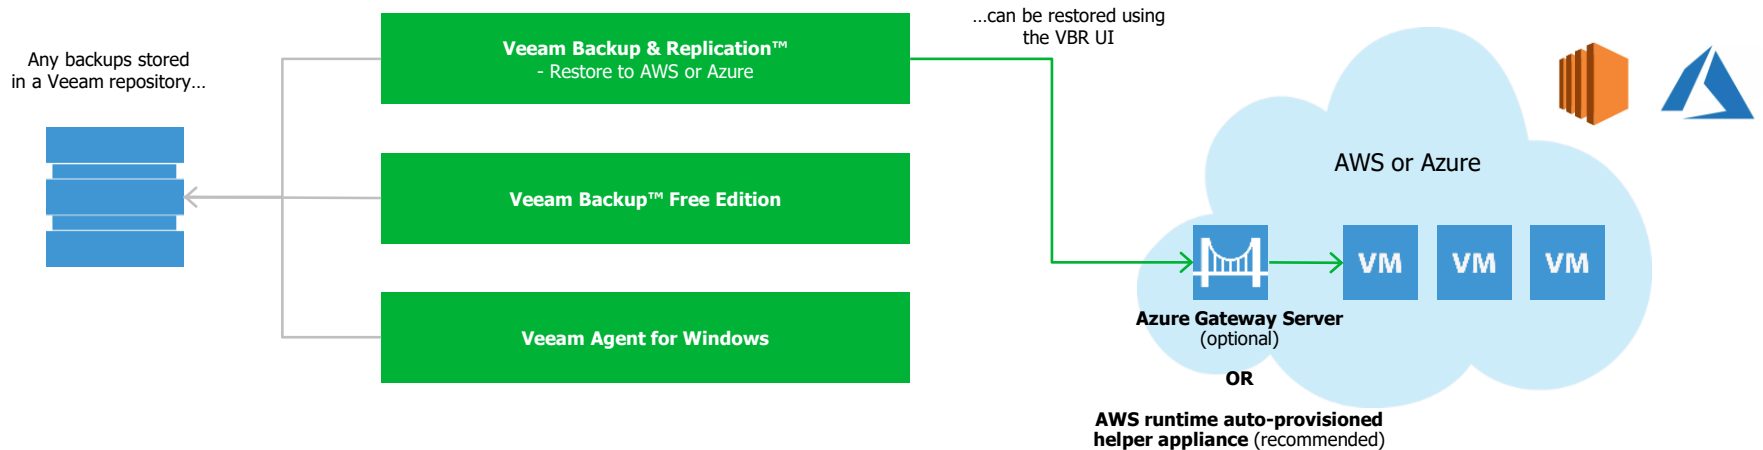

Veeam Cloud Mobility

Quickly restore Windows- and Linux-based VMs, physical servers or endpoints to the cloud

Execute planned workload migrations from on-site to the cloud to reduce on-site resource constraints

Easily create an cloud-based test environment

For AWS EC2: Built-in **UEFI to BIOS** conversion

Veeam Backup for MS Office 365

Why do I need a backup?

Microsoft takes care of it.

This is the biggest misunderstanding in the Office 365 market.

Customer perception

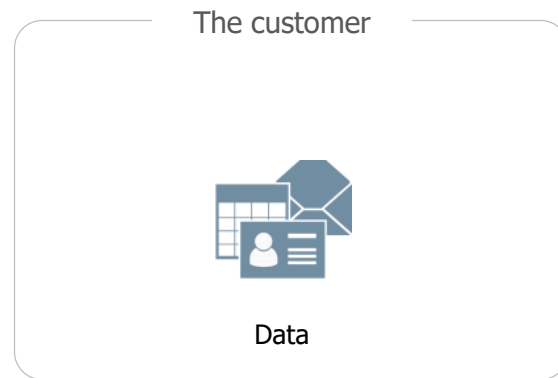

Microsoft takes care of everything

Uptime of Office 365

Customer reality

Microsoft takes care of the infrastructure,
but the data remains the customer's responsibility.

**Protection and long-term retention
of Office 365 data**

Industry-leading recovery flexibility in NEW Veeam Backup *for Microsoft Office 365 v2*

25

unique ways
to **restore** Exchange,
SharePoint and OneDrive
for Business data!

Exchange Online and Exchange on-premises

- 

Restore Exchange item to Exchange Online mailbox or calendar
- 

Restore Exchange item to on-premises Exchange mailbox or calendar
- 

Email Exchange item as an attachment
- 

Save Exchange item as a .MSG
- 

Export folder, item or mailbox as a .PST
- 

Service Provider restore of an Exchange item for a tenant
- 

Entire folder/mailbox compare and restore of missing/changed items

SharePoint Online and SharePoint on-premises

- 

Restore site, library, document to SharePoint Online
- 

Restore site, library, document to on-premises SharePoint
- 

Email SharePoint object as an attachment
- 

Save SharePoint object as a file
- 

Save multiple SharePoint objects as a ZIP
- 

Restore an object to a prior version
- 

Service Provider restore of a SharePoint object for a tenant

OneDrive for Business

- 

Restore users, folders or files (including OneNote notes) to OneDrive for Business
- 

Email as an attachment
- 

Save files or folders
- 

Save multiple files or folders as a ZIP
- 

Restore any file to a prior version
- 

Restore and overwrite users, folders or files
- 

Restore but keep original users, folders or files
- 

Restore with extended attributes and custom access controls
- 

Restore without extended attributes and custom access controls
- 

Service Provider restore of a OneDrive file, folder, or user for a tenant
- 

Restore data located in Microsoft Teams*

*You can protect Microsoft Teams when the underlying storage of the Teams data is within SharePoint Online or Exchange Online. While data can be protected and restored, the Teams tabs and channels cannot. After restoring the item, it can be reattached manually.

Restore E-Mail

The screenshot shows the Veeam Explorer for Microsoft Exchange interface. The window title is "VEEAM EXPLORER FOR MICROSOFT EXCHANGE - 18.05.2018 06:26:57". The interface is divided into several sections:

- Toolbar:** Includes "Restore Folder", "Export Folder", "Compare All Items", "Show Changed Items Only", "Advanced Find", and "Search".
- MAILBOX STORES:** A tree view on the left showing the folder structure for "vbo3.onmicrosoft.com (mail) (18.05.2018)". The "Inbox" folder is selected.
- Search Inbox:** A search bar at the top of the email list.
- Email List:** A table displaying email details. The first email is selected.

	FROM	TO	CC	BCC	SUBJECT
Storage Team	Karl Sattmann				mail to karl at VBO3 organization
Microsoft Onli...	Karl Sattmann				Neue oder geänderte Benu...

At the bottom of the window, it displays "All items loaded 2 items (Total size: 152 KB)" and the Veeam logo.

Restore Sharepoint

The screenshot displays the Veeam Explorer for Microsoft Sharepoint interface. The window title is "VEEAM EXPLORER FOR MICROSOFT SHAREPOINT - 18.05.2018 13:02:24". The interface is divided into several sections:

- Top Bar:** Includes a menu icon, "HOME", and "DOCUMENT" tabs. Below these are icons for "Restore Document", "Save Document", "Send Document", and "Advanced Find Search".
- Left Panel:** Titled "CONTENT DATABASES", it shows a tree view of databases. The selected path is "Databases > vbo1.onmicrosoft.com (Mail-1year) (18.05.2018) > sales > Content > Site Pages".
- Main Area:** A table titled "Search Site Pages" with columns: NAME, SIZE, VERSION, CHECKIN COMMENT, CREATED BY, CREATED, MODIFIED BY, and MODIFIED. A single row is visible for "Home.aspx" (805 B, version 1.0, created by System Account on 14.05.2018 14:45).
- Context Menu:** A right-click context menu is open over the "Home.aspx" row, showing options: "Open", "View History", "Restore Document", "Save Document", "Send Document", and "View Properties".

The status bar at the bottom shows the path: "Databases\vbo1.onmicrosoft.com (Mail-1year) (18.05.2018 13:02:24)\sales\Content\Site Pages" and the Veeam logo.

Restore OneDrive

The screenshot displays the Veeam Explorer for Microsoft OneDrive interface. The title bar reads "VEEAM EXPLORER FOR MICROSOFT ONEDRIVE FOR BUSINESS - 18.05.2018 13:02:24". The interface is divided into a top navigation bar with "HOME" and "ONEDRIVE" tabs, and a main workspace. The workspace is split into a left sidebar and a main content area. The sidebar, titled "CONTENT DATABASES", shows a tree view with "Organizations" expanded to "vbo1.onmicrosoft.com (Mail-1year) (18.05.2018 13:02:24)", which is further expanded to "Paul Ahner". The main content area features a search bar with "Search Paul Ahner" and a table with the following columns: NAME, SIZE, VERSION, CHECKIN COMMENT, CREATED BY, CREATED, MODIFIED BY, and MODIFIED. The table is currently empty. The bottom status bar shows the path "Organizations\vbo1.onmicrosoft.com (Mail-1year) (18.05.2018 13:02:24)\Paul Ahner" and the Veeam logo.
